

Katherm NK – Benefits at a Glance

Project:

Example

- Heat outputs tested independently in accordance with DIN EN 442 / DIN 4704.
- Registered and monitored by **DIN Certco**.
- PowerKon convectors provide a greater surface area for higher output thanks to their corrugated fins.
- Eurokonus valve fittings make screwing valves easier.
- Extensive accessories
- A variety of non-standard designs and project-specific adaptations
